

Objective:

Provide a simple command-line tool for users to manage their daily to-do tasks efficiently.

1. Functional Requirements

ID	Requirement	Description	Priority
F1	Add Task	User can add a new task using a command like <code>task add "Buy groceries"</code> .	High
F2	List Tasks	User can view all tasks with <code>task list</code> .	High
F3	Mark Complete	User can mark a task as done with <code>task done <id></code> .	High
F4	Delete Task	User can remove a task using <code>task delete <id></code> .	Medium

2. Usability Requirements

ID	Requirement	Description	Priority
U1	Simple Commands	All commands must be short, memorable, and consistent (verb-object format).	High
U2	Help Command	User can type <code>task help</code> to see available commands and examples.	High
U3	Clear Output	After each action, the CLI should print a concise confirmation message.	Medium
U4	Error Feedback	If a command is invalid or incomplete, an error message with a usage hint appears.	Medium
